

CLAIMS:

1. Assembly (1) comprising a component (4) provided with a sensitive part (6), which component (4) is connected to a base (3) with an elongated support surface (5) supporting the component (4), characterized in that the component (4) is connected to said support surface (5) only by a side remote from said sensitive element.
5
2. Assembly (1) according to claim 1, characterized in that said component (4) is connected to said base (3) by means of a glue.
3. Assembly (1) according to claim 2, characterized in that, between said
10 sensitive part (6) and the side connected to the support surface (5), the assembly (1) is provided with a groove (9) that extends between said support surface (5) and the component (4).
4. Assembly (1) according to claim 3, characterized in that the support is
15 provided with the groove (9).
5. Assembly (1) according to one of the preceding claims, characterized in that the sensitive element is a mirror.
- 20 6. Assembly (1) according to claim 5, characterized in that the mirror extends at an angle to said support surface (5).
7. Assembly (1) according to one of the preceding claims, characterized in that the component (4) is connected to the base (3) by means of a force applied by a screw or
25 spring to said side remote from said sensitive element.
8. Optical player (11) comprising an assembly (1) according to one of the preceding claims.
